

**ANOTHER FACET OF THE
THE DISARMAMENT LAW,
A FEDERAL POLICE FORCE!**

Civilian law enforcement was previously a matter for state governments, but in the early 1970's, the federal government federalized the states' law enforcement systems. They first developed the "Standard-setting process" to control and *unify* command. The purpose is to develop a *national* policing system, the size of which is to be no larger than that which is only sufficient enough "to preserve internal order". This is a requirement in the "United States Program for General and Complete Disarmament" (see Public Law 87-297). This officer is a member of the Federal Emergency Management Agency. Notice that his identification is not possible which is unlike the historical manner under which traditional American policing system are supposed to meet the public!

**IT IS POSSIBLE THAT THIS
FORCE WILL BE COMPOSED
OF FOREIGN BORN. THE
"SOVIET-AMERICAN POLICE
EXCHANGE PROGRAM" HAS
INTRODUCED THE RUSSIAN
MILITARY TO AMERICAN POL-
ICING SYSTEMS, INCLUDING
HOW TO MAKE ARRESTS.**
