

# **THE HEALTH CARE LEGISLATION ADDS TO THE DESTRUCTION OF AMERICAN LIBERTY**

**There is no doubt about it! Obama/Pelosi/Biden are destroying the victories our Founding Fathers fought and died for in the War for Independence! We are losing the liberty\* which they suffered to give us. The power-mad socialist Washington, D.C. gang is taking over the control of our personal lives! Currently, it is the takeover of our medical decision-making which belongs to the people--not to government! American health care industry and know-how will suffer vastly as it becomes rationed by this socialist gang, and the United States loses the incentive of *would-be-doctors* to excel or even to participate.**

**On March 21, 2010 the socialist gang in Washington, D.C. used bribery *right out in the open* to gain votes, and no commentator or representative has pushed for an investigation of the criminal acts of bribery that were committed to steal votes, and further destroy the peoples' proper form of government. Obama admitted saying "this is the kind of change I was talking about". Not only will health care be rationed, and personal decisions be taken away from the people, our true form of government is being surrendered on a continuing and gradual basis to shrewd designers and practitioners of such improprieties. Next will come the campaign to surrender privately-owned firearms, which Obama must now consider under the Small Arms Treaty heralded by the United Nations.**

**What is operating in Washington, D.C. today is not the government system our founding fathers designed. No one should hold office who cannot keep his oath of allegiance to the true principles and rules of the Constitutional system. Please read the attached letter to Utah Governor C. L. Otter.**

**\*Liberty means you have the power to control your own life, and make your own decisions. It is freedom from control and restraint of any kind. Liberty allows one to use his own judgment. While rights are an endowment from the Creator, they cannot be exercised without the presence of liberty. Liberty means being in control. Freedom is a condition, but it cannot be realized without liberty. The absence of liberty is slavery.**
