

The intent of this legislation is to counter the efforts of the un-Constitutional *Small Arms Treaty*. If we can get just one state (out of the eight states that are lacking a pro-gun state provision) to introduce and pass this measure, it may gain enough nationwide attention to enhance other states in addition to take a stance against this treaty that wants to disarm us.

SUGGESTED STATE OR FEDERAL LEGISLATION OR INITIATIVE

The right of the people to keep and bear arms, individually and collectively, is a God-given natural right, the keystone of the people's liberty, and belongs to all the people. This right is not subject to any governmental effort, attempt or other related means, which seeks to repeal, revoke, rescind, surrender, diminish, or suspend it. Any public official, whether elected or non-elected, who is involved in restricting, denying use, or approves of abolishing the natural right of law-abiding people to purchase, keep, possess, own, use, sell, lease, loan, or trade arms or ammunition, and whose duty has been to assist in maintaining the security of a free state, is in violation of his (or her) Oath of Office, and is no longer vested with the authority, responsibility, or the people's approval to further represent the people, and shall be charged with immediate and permanent dismissal from office. Violation or denial of the people's natural right to arms is a crime for which the violator is subject to immediate discharge from government service without severance or retirement pay. Presidential Agreements, state or federal executive order(s), state or federal legislation, treaties, martial law, and/or any other means, or conditions, which order or intend to disarm the people are acts, contrary to, and in violation of, the supreme law of this land: the United States Constitution and the Bill of Rights.

This measure restores the *United States Constitution* and the *Bill of Rights* as Supreme Law, and refutes the ability of the United Nations' attempt to disarm the American citizens. The people's right and authority to keep and bear arms needs to be protected; otherwise, the people will lose their authority and control of their republic. Guns = authority and no guns = no authority! Armed citizens = a republic, but no guns = no republic, no authority, no rights, and no freedom! The above effort was drafted to promote and insure government's adherence to the laws which our Founding Fathers wisely drafted and passed as supreme law. Arms were meant to protect the people from tyranny in government and from those who are bent upon evil, intending to do harm to innocent and law-abiding people. Very possibly, with the exception of Senator Rand Paul, and a few other Constitutional federal legislators, there may not be enough legislators to agree to sponsoring or giving this measure the necessary support it deserves. It may require, in order to win passage; especially in a state like California that this measure be enacted by the initiative process. This measure, if enacted in every state will solve the upcoming pervasive problem with the un-constitutional *Small Arms Treaty*. California (and 7 other states) are in great danger without a gun provision in their own State Constitution!

With the upcoming expectancy of President Barack Obama to sign the *Small Arms Treaty*, states without an arms provision will have no defense or documentation to refute the treaty and guard their gun-owning citizens against a wipeout of their right to arms. This measure can be enacted into law by legislative action, or by the initiative process in those states which do not have any firearms provision in their own State Constitution. Some states have relied solely upon the *Bill of Rights* to protect their right to arms. With the federal government now pushing for enactment of this ill-proposed treaty, full protection is now quite necessary. The clarity and strength of this provision can be added to many State Constitutions. It will serve to enhance a short pro-gun provision, as some States have, or serve to *directly* connect states with no measure at all to the Second Amendment of the "*Bill of Rights*".
